

**Please help**  
**SAVE AMERICA'S WILD HORSES AND BURROS!**

**Mustangs panic in recent round-up. Four horses died this day.**

We, the undersigned, affirm that America's wild horses and burros are a living link to our past, an icon of freedom, and a treasured national resource.

We ask you to:

Support and pass into law HR 249, prohibiting the sale of wild horses and burros for slaughter and "processing into commercial products"; as well support future legislation that bans slaughter and offers other protections for America's equines;

Enact a moratorium on all round-ups until actual numbers of wild horses and burros on public lands have been independently assessed;

Enact the restoration of protected habitat identified by the 1971 Act;

Enact implementation of in-the-wild management wherever feasible, including replacing gathers with humane birth control as the primary means of population control;

Release horses and burros in captivity back into the wild; and

Under no circumstances should any healthy wild horses or burros be euthanized.

America's wild mustangs and burros are an American treasure, both as a reintroduced native wildlife species and a cultural and historic resource. More than any other creature they have died for us in our wars, and partnered with us in the creation of this country. We ask you to ensure that they will be allowed to thrive in genetically viable herds for future generations to enjoy on our public lands.

Sincerely,  
The Undersigned

SAVE AMERICA'S WILD HORSES AND BURROS!
